new south wales

Mobile Echo NSW provides diagnostic echocardiograms to residential age care facilities, rural practices, hospitals and residential homes across NSW, using cloud based platforms and the most innovative ultrasound technology.

## mobile echocardiogram service

**Servicing the elderly, disabled and rural patients across Sydney and NSW**

### For the elderly

For the elderly, disabled and some rural patients, heading to a hospital isn't always easy or possible, making the patient and family members endure unnecessary stress. Here at Mobile Echo NSW we endeavour to reduce the need for patient transport and unnecessary stress by providing echocardiography services to your door.

### For rural suburbs

For rural suburbs, travelling to a hospital or waiting for a local doctor to become available may be lengthy. We aim to open up accessibility by hosting monthly mobile GP clinics, where we can service the needs of the locals without the stress of travel.

Please note: Mobile echo fees apply, which require payment within 24hrs of the service. When available, Medicare rebates will be submitted on the patients behalf. For a full price guide please visit our website or call us.

We want to make this service as easy as possible for caregivers, referrals and patients. If you are in need of this service and would like to make a booking, please visit our website or call us to discuss the process.
